Reasons for Allowance

8. Claims 1, 2 and 4-18 are allowed.
9. The following is an examiner's statement of reasons for allowance. The vehicle as claimed is not shown or suggested in the prior art because of the use of a vehicle

that is comprised of a plurality of carriages that are coupled by means of upper and lower articulated connections, said upper articulated connections being configured to permit turning movements about a vertical axis, pitching movements about a transverse axis, and rolling movements about a longitudinal axis of said vehicle, where a connecting element of said upper articulated connection is in the form of a rigid connector rod that is connected to said carriages by means of ball and socket joints, or said connecting element is in the form of a twistable connector rod that is connected to said carriages by means of single-axle joints.

10. The prior art as disclosed by Karasek (US 6,250,231) shows the use of an articulated vehicle that is comprised of at least two carriages that are coupled by means of upper and lower articulated connections that permit turning movements about a vertical axis, where said upper articulated connection is also configured to carry out pitching movements about a transverse axis. Koch et al. (US 5,487,555) discloses a hinge connection between two parts of an articulated vehicle that includes an articulated connection with a connecting element that permits pivoting and rolling movements between said parts about a longitudinal axis of said vehicle.

Conclusion

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
